Analyzing New Zealand's Trade: A Data-driven Perspective on Exports and Imports

BY PABLO FRANCISCO RESCH

Implemented technological tools

01 Excel

The exploratory and initial cleaning stage was performed in Microsoft Excel.

02 Figma

This tool was used to create the mockup of what the visualization would look like.

03 Power BI

Power BI has been used to generate the visualization in a professional and interactive manner.

04 Canva

This report has been created using Canva.

Data Base

Listing: Set and Tablas

The project consists of three groups or sets of tables that serve as input to address the stated objectives. Each of these sets, along with their respective tables, is defined below:

<u>SET 1</u>	<u>SET 2</u>	<u>SET 3</u>
01 exports	01 exports_by_destination	01 exports_by_sitc
02 imports	02 imports_by_country	02 imports_by_sitc
03 exchange_rate	03 country_by_code	03 sitc
04 period		

SET 1 - Tablas

01 exports

This table presents the value of New Zealand's exports, measured in its national currency (NZ dollar), in terms of FOB (Free On Board) value, along with adjustments for trend and seasonality. Additionally, it displays the value of re-exports.

02 imports

This table presents the value of New Zealand's exports, measured in its national currency (NZ dollar), in terms of CIF (Cost, Insurance and Freight) value, along with adjustments for trend and "Value For Duty." Additionally, it displays the value corresponding to significant imports.

03 exchange_rate

The table contains the historical exchange rate series of New Zealand's national currency against the currencies of its major trading partners.

04 period

This table contains the time series data that encompasses this work and is related to the other tables in this set.

SET 2 - Tables

01 exports_by_destination

The exports by destination" breaks down the destinations to which products are sent and provides information about New Zealand's trading partners.

02 imports_by_country

This table displays the origin of imported products, providing information about trading partners and the diversification of import sources in a specific country.

03 country_by_code

The table includes the set of countries with which New Zealand has trade relations, both for exports and imports. Additionally, it groups them by region.
